

APEX ODEV

Boolean Assignment

```
Boolean Status;  
Status = true;  
System.debug(Status);
```

Date Variable Assignment

```
Date workDate = date.today();  
System.debug(workDate);
```

Assign Datetime

```
DateTime newTime = DateTime.now();  
String workDate = newTime.format('yyyy/MM/dd hh:mm:ss');  
System.debug(workDate);
```

Assign Time

```
Time myTime=Time.newSaat(08,55,00,00);  
System.debug(myTime);
```

Datetime Methods

```
Datetime myTime=Datetime.now();  
System.debug('now: ' + myTime);  
System.debug(myTime.addDays(5));  
System.debug(myTime.addHours(8));
```

```
System.debug(myTime.addMinutes(40));  
System.debug(myTime.addSeconds(50));  
System.debug(myTime.addYears(1));  
System.debug(myTime.hour());  
System.debug(myTime.minute());  
System.debug(myTime.month());  
//System.debug(myTime.newInstance());  
System.debug(Datetime.now());  
System.debug(myTime.second());  
System.debug(myTime.year());
```
